

## UOVO OUTDOOR

Ben Swildens, 1972

In production since 1972, the Uovo table lamp has achieved a great success thanks to its ironic and elegant design. Established design icon, Uovo is one of the FontanaArte's most representative projects. A natural shape that has always been a symbol of perfection, in which symmetry and asymmetry coexist harmoniously. The shell contains a light source: an ironic idea that still conquers today. As in nature, even in the Uovo lamp the shell is an absolute example of lightness: an elegant shape in satin white blown glass, which uniformly diffuses a warm and enveloping light. In the three sizes available there is all the versatility of a collection designed for multiple uses: from a tiny service lamp - in the smaller version - to a luminous sculpture, the protagonist of the space, in the larger version. With the FontanaArte 2021 Collection, Uovo is again available in the outdoor version.

Outdoor table or floor lamp with dimmable diffused light. Opal satin white polyethylene diffuser made with rotational molding. Stainless steel frame. Black power cord. Schuko plug. Light source and dimmer not included.
