

BIANCA SMALL

Matti Klenell, 2015

Bianca is a family of luminaires with the decoration on the diffuser surface features an orderly series of shallow delicate grooves etched into the white glass, yielding an effect resembling small footprints on fresh snow. Mouth blown, belt sanded and dipped in acid to obtain the distinctive 'silk effect' typical of fine glassware, Bianca diffusers are available in three different diameters to complete all thirteen types of luminaires belonging to the family. The largest diffuser has a 50 cm diameter and, owing to its dimensions and the amount of glass involved, continues to pose a considerable challenge even for the ablest of glassblowers trained in the fixed-mould blowing technique, which – according to the traditional Venetian production process – is performed without any external aids for turning and shaping the glass blob inside the mould, but relies solely on the glassblower's skill and lung capacity. Bianca is available in the following versions: table-top without stem, floor-standing with base and stem, pendant, wall-mounted and ceiling-mounted. The matt white coating applied to the various metal supports evokes the name and colour of the diffuser. Bianca produces a very warm, diffused and enveloping light emission in the surrounding environment.

Wall/ceiling lamp with diffused light, phase cut dimmer. Milk-white diffuser made of blown glass with satin-finish. Painted metal frame. Integrated led.
