

PIRELLONE

Gio Ponti, 1967

Pirellone and Pirellina have been lighting classics for 40 years. Two pieces of curved glass held in place by metal elements at the base and the top: the secret of this simple structure lies in the use of special impact-resistant glass.

Floor lamp with diffused/indirect and partially dimmable light with sliding switch. The dimmer allows to switch on/off the light sources inside the diffuser, and it provides dimming for the upper bulb. Frame made of nickel-plated metal. Diffuser made of curved pressed glass. Black power cable, dimmer and plug. Shuko plug, adapter not included. Bulb not included.
