

TRIPOD

Front Design, 2017

Slender, elegant and extremely long legs give this floor lamp a sense of lightness, yet also of great stability. Like the ancient Greek tripod, a symbol of hospitality, the end of each support is fitted with a Led light source with different forms and functions: the longest leg has a sphere that produces a diffused ambient light, while the other two have adjustable spotlights for a direct and concentrated light. The structure is kept simple thanks to the cable organizing system, which runs inside the tubular legs. The lamp comes with frame and fixtures, which lend the lamp a precious elegance.

Floor lamp with diffused, directional and partially dimmable light by double switch-on. The dimmer permit to adjust the light intensity of the spherical diffuser. Painted metal frame. Diffuser made of opalyne blown glass with satin-finish. Two adjustable reflectos made of painted metal. Black power cable, switch and plug. European two-pole plug. Bulb not included.
