

NOBI LARGE

Metis Lighting, 1992

In floor, wall and suspension versions, Nobi guarantees total practicality for innovative elegant design. The adjoined convex lenses are held in place by a system of small clamps and fixed to the metal structure with two pins, the same on which the light source is also mounted. The diffuser can thus rotate on itself and orient the light flow in different directions. Innovative and available in multiple versions, Nobi provides maximum functionality while retaining a powerful aesthetic presence.

Floor lamp with diffused and dimmable light. By installing the supplied reflector, the lamp produces direct/indirect directional light. Chromed metal frame. Adjustable satin glass diffusers and reflector made of anodized aluminium. Black power cable, dimmer and plug. European two-pole plug. Bulb not included.
