

SCINTILLA MEDIUM

Piero e Livio Castiglioni, 1972

The absolutely novel Scintilla system combines the essential versatility of a decorative lamp and a lighting capacity comparable to a technical system. The great success of this system persuaded the company to design a free-standing version in the early eighties, with the main structure fastened to the base and stem in metal.

Suspension lamp with diffused and dimmable light. Frame made of satined nickel-plated metal. The lamp is supplied with two different diffusers made of transparent and sandblasted borosilicate glass and a spacer for electrical connections. Available separately a reflector made of anodized aluminum, for indirect beam. Ceiling connection in painted polymer. Bulb not included.
