

# MERIDIANO

**Gabriele e Oscar Buratti**

The “shape of light” is the central theme of this project by Gabriele and Oscar Buratti. Starting with the Equatore family of lamps, presented in 2017, the collection now includes new finishes and the Meridiano and Tropico series. These lamps feature glass and metal forms that diffuse light through opaline, colored, and transparent layers, creating fascinating effects. The new Meridiano lamp has a vertical cylindrical tube that diffuses light in a transparent glass capsule, defining its elegant ovoid shape. Available in two sizes, Meridiano comes as medium and large suspended lamps, and a medium-sized table version.
